## EXPERIENCE

### Frontend Developer | Jun 2025 – present

Esterox LLC

- Developed and maintained high-impact product features across two platforms, including a drag-and-drop funnel builder, community spaces, messaging, event flows, and analytics dashboards — delivering fast, responsive, and user-friendly experiences.
- Built scalable UI architectures using microfrontends, reusable component systems, and modern state-management patterns, enabling independent feature deployment and smoother cross-team collaboration.
- Collaborated with cross-functional teams to deliver high-quality products

### Full Stack Developer | Jun 2024 – Jun 2025

Fidem LLC

- Developed and maintained a large-scale e-commerce platform using Vue, Nuxt, Laravel, and Bagisto
- Integrated various payment methods and created custom features
- Collaborated with cross-functional teams to deliver high-quality products

### Full Stack Developer | Mar 2023 – Jun 2024

M&D Systems LLC

- Worked on a large application called theshedapp using Vue and Laravel
- Built and consumed APIs, implemented new features, and integrated payment solutions
- Maintained scalable and maintainable code across frontend and backend

### Frontend Blockchain Developer | Jan 2021 – Nov 2022

Exio Tech

- Developed landing pages and full websites using Nuxt.js
- Integrated blockchain functionality using Web3.js for smart contract interactions
- Contributed to various blockchain-based projects from ideation to deployment
